2016 REPORT TO MEMBERS

THE PENSION PLAN

The Telecommunication Workers Pension Plan (TWPP) is a type of Defined Benefit Plan, which is administered, in most (if not all) respects, like a negotiated contribution plan. The TWPP is a career average earnings plan that specifies the formula for determination of benefit entitlements and therefore provides members with a “defined” amount of pension. The defined amount of pension provided by the TWPP is based on a formula of 1.75% of gross earnings. On an annual basis, the Trustees, at their discretion and taking into consideration the Plan’s financial performance, approve Annual Earnings updates to average earnings in the previous 3-years. The formula for the “update” is $1.75\% \times \text{Average Earnings} \times \text{years of Credited Service}$. The member’s pension entitlement is based on the greater of the amounts before and after the update.

Currently, the Employer contribution rate is 10% of gross earnings and the Employees’ contribution rates range from 3% to 6% of gross earnings, depending on the age of the member. The benefits provided by the TWPP are determined by the Trustees based on the contributions and cost of benefits, which is determined on an actuarial basis as the total amount of money required to provide the given level of benefits for all members of the Plan.

Effective July 1, 2016 the Pensions Benefits Standards Act and Regulations were amended directing Plans to provide additional information to Members on their Annual Statements. The administration office is working on these changes and Members should expect to see a new 2016 Annual Statement in the spring of 2017.

The TWPP adopted an investment strategy that matches the assets and liabilities of the Plan in terms of duration (price sensitivity due to changes in interest rates) and cash flows. Consequently, the Plan's investments are in assets that have continued to provide excellent protection for the benefits promised by the Plan. Most of the Plan's assets are in fixed income investments, such as Canadian and Provincial Government bonds, high quality corporate bonds and mortgages. The Plan also has investments in income producing real estate, such as Concert Properties, hedge fund of funds, infrastructure, private credit funds and equities (both public and private). The Plan's direct exposure to equities is very small at less than 4% of the total portfolio. There is some indirect exposure through the Plan's investment in hedge fund of funds.

The Plan's investment strategy is designed to ensure that the Plan's benefits can be provided with a high degree of certainty. Annual actuarial valuations and asset/liability modeling analyses are performed to determine if adjustments to the investment strategy are required. In between annual reviews, the Plan's professional advisors monitor the performance of the assets, and provide regular updates to the Board of Trustees. This ensures that the Plan continues to meet its goals and provides the level of pension benefits reported to the Plan members annually.

ACTUARIAL VALUATION RESULTS AT JANUARY 1, 2016

The Actuarial Valuation results as of January 1, 2016 show that the Plan continues to be soundly funded. The Plan is well positioned to provide the benefits accrued to date and those expected to accrue in the future.

The assets at the valuation date exceeded the liabilities for benefits accrued to date by about \$788 million. On a total target plan basis (which includes both benefits earned to date plus future benefits, including annual earnings updates for active members until they retire), the Plan's position has increased from a surplus of \$57 million at January 1, 2015 (101% funded) to a surplus of \$173 million at January 1, 2016 (104% funded).

The excess is based on various assumptions and forecasts, which by their nature are forward looking and may prove to be inaccurate. Plan members should be mindful not to place undue reliance on such statements as a number of factors could cause the excess to vary significantly. In addition while this excess is substantial, it is needed to help provide for:

- (i) the benefits that will accrue in the future to active members; and
- (ii) the annual update of benefits for active members, so that members retiring and leaving the Plan receive a benefit based on earnings immediately before retirement or leaving the Plan.

Any remaining excess will be used to provide a contingency reserve for unanticipated events, such as investments performing worse than expected, and for other Plan improvements as may be determined by the Trustees. These might include benefit increases for retired members.

Due to the funded position of the Plan as at January 1, 2015, the next formal Actuarial Report is not required to be filed with the regulators until 2018 and will be based on the actuarial valuation of the Plan as at January 1, 2018. A complete copy of the most recent formal Actuarial Report as at January 1, 2015 can be found on the TWPP website at www.twplans.com.
